

Revising the Community Plan; Test Valley Sustainable Community Strategy

Suggested planning process for Action Groups

Seven questions are answered consecutively as follows:

1. What outcome do we want to achieve in terms of community well-being?
2. How would we know that we have achieved the outcome?
3. How can we measure this? (Performance indicators)
4. How are we doing currently on the most important of these measures?
5. Who are the partners that have a role to play in doing better?
6. What do we know about what works to do better including low cost, no cost ideas
7. What do we propose to do? (This will form the action plan)

The action plan will contain performance measures that will indicate 'how much did we do? How well did we do it?'
